## Decontamination

It is the responsibility of the sender to properly decontaminate and remove any hazardous, potentially hazardous, dangerous, or potentially dangerous materials before shipment to Teledyne CETAC Technologies.

### Equipment not accepted

Teledyne CETAC Technologies does not accept equipment that has been:

- Exposed to radioactive elements
- Used in BioSafety level 4 laboratories.

### Tubing must be removed

All Tubing, including pump tubing must be removed prior to shipment to Teledyne CETAC Technologies. If you are unsure of how to remove tubing, please contact Teledyne CETAC Technologies.

### Decontamination Details:

Has the instrument or equipment been exposed to any infectious agents/biological samples assigned to biosafety levels 2 or 3? \_\_\_\_\_ If so, please indicate the agent and bio-safety hazard class.

Has the instrument been exposed to chemical solutions? \_\_\_\_\_

If so, please list the chemicals used in the instrument with their concentration levels.

### Decontamination Procedures:

Please indicate below the procedures used to decontaminate the equipment being returned:

### Additional Information

Please list any other pertinent safety information

If any returned equipment is found to contain hazardous or dangerous material(s) in quantities that could cause personal injury or violate DOT, IATA, or other transportation regulations, the carrier and proper authorities will be notified. See Federal Regulations Title 49 CFR, or visit <http://hazmat.dot.gov> or <http://www.fmcsa.dot.gov> for more information.

If any returned equipment is found to contain hazardous materials endangering danger the health of Teledyne employees and/or require disposal as hazardous waste, an **additional minimum charge** of **\$1,000 USD** per contaminated instrument and/or its tubing will be assessed to cover disposal costs and any other cost related to the cleaning activity.

### DECLARATION:

I certify that this instrument has been properly decontaminated and is free of any hazardous, potentially hazardous, dangerous, or potentially dangerous materials and the tubing has been removed.
